## SUMMARY

---

Software engineer passionate about designing intuitive, accessible, and user-centered technologies. Experienced in building software from GPS-integrated 360° video inspection platforms to research tools and a coding educational platform reaching 1M+ learners. I thrive in collaborative environments and aspire to advance the future of human-first software design.

## EXPERIENCE

---

### OPTIC SYSTEMS

Software Engineer

Remote

Nov 2025 – Present

- Developing 360° video inspection platform using TypeScript, JavaScript, PHP, Node.js, and SQL.
- Integrating mapping formats (geoJSON, GPX) and third-party APIs.
- Collaborating across remote teams to ship scalable features and refactor legacy components.

### AUTOZONE Memphis, TN

Software Engineer Intern

Jun 2025 – Aug 2025

- Built full-stack features with React, TypeScript, and REST APIs on high-traffic product pages.
- Developed NLP-powered diagnostic tool trained on 1.4M+ words.
- Deployed scalable solutions on Google Cloud and improved UX with data-driven insights.

### INSTITUTE FOR INTELLIGENT SYSTEMS

Software Engineer Intern

Memphis, TN

Jan 2025 – May 2025

- Shipped upgrades to Glyphwitch, a full-stack annotation tool built with Meteor.js, boosting researcher productivity by 40%
- Enhanced UX responsiveness and usability by 25% through debugging and performance optimization

### EMPRINNOS

Co-Founder & Software Engineer

Memphis, TN

Jul 2019 – Aug 2023

- Co-founded a Spanish-language CS education startup reaching 1M+ students across Latin America
- Cut page load times by 45% via async module loading and compression, improving retention in low-bandwidth regions
- Led CI/CD rollout, A/B testing, and cross-device optimization to scale platform access and engagement

## EDUCATION

---

### UNIVERSITY OF MEMPHIS

B.S. in Computer Science

Magna Cum Laude

Memphis, TN

Aug 2021 – May 2025

## PROJECTS

---

### EXPENSELY (React Native/Expo)

Jun 2025 – Present

- Core contributor to App Store budgeting app; built transaction engine ensuring data integrity and seamless currency handling
- Designed sleek, personalizable UI with dark mode and smooth animations; optimized for performance across devices

### ACADEMICS LIST (React/Django/Google Maps)

Aug 2024 – Dec 2024

- Built a location-based business review platform supporting 10K+ monthly user interactions
- Integrated Google Maps and geoJSON for dynamic location rendering and filtering
- Led Agile sprint cycles and code reviews; shortened revision time by 50% through tight sponsor feedback loop

## SKILLS

---

**Natural Languages:** Fluent in English and Spanish, conversant in German
